

## ELECTROLYZER TEST STANDS

Features & Specifications

SKYRE is a leading provider of electrolyzer testing and validation equipment.

Our base systems accommodate PEM, AEM, and water alkaline testing.

Our designs are customized to your needs for factory and laboratory integration as well as stand-alone containerized system installations.

## FEATURES

Fully customizable

PEM, AEM and water alkaline cell testing

Flexible frame design to minimize maintenance time

Readily available commercial parts = reduced maintenance costs

Common core design = reduced time-to-market

Proven SKYRE data acquisition software package

Common core architecture and structured design process = maximized safety

## SPECIFICATIONS

Power Range: kW – MW scale

Pressure Control: manual and electronic; custom outlet pressures available

Stack Cooling: liquid or air-based packages available

Water Flows: can be customer programmed

Power Supply: can be supplied by SKYRE or customer

Safety Features: built into highly reliable system design

Data Logging: can be customized based on customer needs

Dimensions: various frame sizes
